

ENES FURKAN SENGUL

Junior Unity Game Developer | Mobile Puzzle & Casual Games

efrknsngl@gmail.com | 05370408509 | Istanbul, Turkey | efurkansngl.github.io/Portfolio | linkedin.com/in/efurkansengul | github.com/eFurkanSngl
| sgl-games.vercel.app

PROFESSIONAL SUMMARY

Junior Unity Game Developer focused on mobile puzzle and casual games. Experienced with Unity, C#, OOP/SOLID architecture, ScriptableObject-driven systems, Object Pooling, event-driven gameplay, Android build preparation, performance optimization, and game feel polish.

TECHNICAL SKILLS

Game Development	Gameplay Systems, Level Design, Game Mechanics, Game Feel & Polish, Mobile Game Optimization, 2D/3D Development
Architecture	OOP, SOLID Principles, Clean Code, Event-Driven Architecture, Data-Driven Design, Modular Architecture, Zenject, Object Pooling
Unity & Tools	Unity Engine, ScriptableObject Architecture, Unity UI, UnityAction/UnityEvent, Particle System, Audio System, Cinemachine, DOTween, Odin Inspector, Unity Profiler
Build & Workflow	Git, GitHub, SourceTree, Google Play Console, Android Build Pipeline, SDK Integration, Mobile Build Optimization
Programming	C# Intermediate, Python Basic, JavaScript Basic

PROFESSIONAL EXPERIENCE

Jr. Game Developer, Virtual Projects | Istanbul, Turkey

11/2025 - 04/2026

Intern Game Developer: Jun 2025 - Oct 2025

- Contributed to mobile puzzle and casual game prototypes using Unity and C#, including Block Sort-style mechanics and match-based gameplay systems.
- Implemented gameplay mechanics, UI interactions, game flow systems, animation polish, VFX, and performance-oriented improvements.
- Improved animation performance by approximately 20% through DOTween optimization and efficient tween usage.
- Participated in team development using Git/GitHub and task-based pipelines.

Intern Game Developer, Ice Frost

02/2024 - 09/2024

- Developed mobile puzzle prototypes using Unity and C# with a focus on clean gameplay logic and maintainable code.
- Worked on core gameplay mechanics following OOP principles.
- Gained hands-on experience with Object Pooling, event-driven structures, level logic, UI interactions, and optimized game flow.

PROJECT EXPERIENCE

Fill The Blocks | sgl-games.vercel.app

01/2026 - 03/2026

- Developed a grid-based mobile puzzle game focused on scalable architecture, performance optimization, and production-ready systems.
- Designed a ScriptableObject-driven block framework with separated runtime grid state and modular gameplay systems using OOP/SOLID principles.
- Optimized mobile performance with Object Pooling, localized grid validation, particle pooling, audio, haptic services, and Android optimization.

Tech: Grid Architecture, OOP/SOLID, Event-Driven Systems, Object Pooling, Android Optimization, Game Feel

ENES FURKAN SENGUL

Junior Unity Game Developer | Mobile Puzzle & Casual Games

efrknsngl@gmail.com | 05370408509 | Istanbul, Turkey | efurkansngl.github.io/Portfolio | linkedin.com/in/efurkansengul | github.com/eFurkanSngl | sgl-games.vercel.app

PROJECT EXPERIENCE CONTINUED

Find The Differences - AI Personalized Mobile Puzzle Game | sgl-games.vercel.app

01/2026 - 03/2026

- Developed and shipped a personalized spot-the-difference puzzle game where players identify visual differences between two scene images.
- Built event-driven level runtime, difference detection, hints/lives systems, player progression, store flow, and shader-based hint focus.
- Implemented an AI avatar pipeline from photo upload to backend generation and local persistence.

Tech: Unity, C#, AI Flow, Difference Detection, Event-Driven Architecture, Mobile Puzzle

This is Blast Clone | github.com/eFurkanSngl/This-is-Blast-Clone-VP

07/2025 - 08/2025

- Built a modular Blast-style gameplay architecture using OOP/SOLID principles with a decoupled Zenject SignalBus event system.
- Implemented Object Pooling and ScriptableObject-driven grid/level data to optimize memory usage, tile spawning, and Android runtime performance.
- Reduced GC allocations by approximately 30% while polishing gameplay with DOTween, haptics, particles, SFX, and responsive UI transitions.

Tech: Zenject, SignalBus, Object Pooling, ScriptableObject, DOTween, GC Optimization

Royal Match Clone | github.com/eFurkanSngl/Royal-Match-Clone

06/2025 - 07/2025

- Built a Match-3 core with optimized detection for lines, 2x2 squares, L shapes, and T shapes by checking only moved tiles.
- Implemented Horizontal/Vertical Rocket, Bomb, Light Bomb, Propeller, obstacles, Object Pooling, and event-driven score/UI logic.

Tech: Match-3 Systems, Zenject, Object Pooling, DOTween, Power-Ups, Obstacles, Event-Driven UI

Flip It! | github.com/eFurkanSngl/FlipIt- | frknsngl.itch.io/flip-it

05/2025 - 06/2025

- Designed and developed the project solo with modular OOP/SOLID-compliant architecture and central GameManager flow.
- Created an extensible power-up system using abstract/virtual classes and event-driven gameplay with UnityAction.

Tech: OOP/SOLID, UnityAction, Object Pooling, Power-Up System, Responsive UI, PlayerPrefs

CERTIFICATES & EDUCATION

Game Developer Certificate - 240h technical + 50h career training, Mar 2024 - Aug 2024 | Unity Essentials Pathway - Jan 2025 | C# 101, Turckcell Gelecegi Yazanlar - Mar 2025 | Unity 101, Turckcell Gelecegi Yazanlar - Feb 2025 | C# - BTK Akademi - Jul 2023 | C# & Unity - Udemy 2D and 3D Game - Apr 2024 | Python I & II - Cisco Networking Academy - May 2024 | Coding for Everyone - TOBETO - 34h programming fundamentals | Mutfak Sanatları Egitimi - Istanbul Gelisim University, 2019 - 2021
